

Announces a Course on

Research in Medical Science Skills and Techniques

Syrian Private University is pleased to announce a new and exciting course on scientific research and publishing in medical science.

- The course is open to students of all medical faculties: medicine, dentistry and pharmacy.
 - Students will have the opportunity to develop their knowledge and capabilities in the principles and practice of research, scientific writing, and presentation skills.
 - The course is practical and workshop-based and will require the student's full attendance and dedication throughout the course.
 - Students who successfully finish the course will be granted a certificate from the university.
 - They will also have the opportunity to take part in original research leading to publication in international journals or conferences.
 - The course will take place during weeks 5 to 15 of Semester 1, 2017-18.
 - The workshops will be supervised by Dr. Lama Aljabban and Prof. Dr Nazir Ibrahim.
 - At the end of the Academic Year, students will be able to present their work in a Conference of Medical Research organized by the university.
-
- **To qualify for registration in this course, you should:**
 1. Be a student of medicine, dentistry, or pharmacy at Syrian Private University.
